ASSURE

Product Type:	Oxygen bleach.
Physical Description:	White, free-flowing granular product.
Features:	Provides safe bleaching of resin-treated (permanent press) polyester-cotton fabrics. Contains a very effective fluorescent whitening agent to enhance whiteness appearance. Eliminates chlorine yellowing and damage problems and reduces tensile strength loss. Dissolves completely thus eliminating pinholing and rinses freely. No anti-chlor is required.
Directions For Use:	May be used on many light colored or white fabrics as well as polyester-cotton blends. Add **ASSURE** dry to the wheel. **ASSURE** should be used with sufficient detergent to maintain a pH above 10.0 at a temperature of 145˚F minimum. Since soil content, wash formulas and machinery variations influence wash results, consult with your Gurtler Technical Sales Representative for use amounts.
Warning:	**ASSURE** is a strong oxidizer. Harmful is swallowed. May cause skin and eye irritation.
