ELEGANCE

PRODUCT TYPE: Laundry Starch

PHYSICAL DEPCRIPTION: A free-flowing off-white powder with cinnamon odor. Highly refined 50/50 corn-wheat blend.

FEATURES: A chemically processed, pregelatinized laundry starch. Penetrates fibers quickly and thoroughly for a smooth finish. Contains a special lubricant that resists sticking on presses.

USE INSTRUCTIONS: Starch in Wheel - Contact your Gurtler Sales Representative for use amounts and conditions of use for best results.

Most starches (dry) should be manually added to the washer. Starches are not chemically suitable for injection into washers. Often water will get a starch on contact. When starches do inject, it is due to water agitation from the pressure exerted on the starch.

FIRST AID: **ELEGANCE** is not a toxic substance. Due to its powdered form, it is somewhat dusty and care should be taken to avoid breathing dust if possible.
