Gurtler Solar Solve - Product Sheet

Specialty Liquid Detergent

Solar Solv is a concentrated liquid laundry detergent that contains a unique nonionic surfactant system providing effective detergency at low processing temperatures. Designed to facilitate removal of oily soils from synthetic fabrics. Provides effective cleaning action on synthetics and blends of cottons and polyester. It is specially formulated with fast “wetting” detergents for the fast-action washing requirements in tunnel washing systems. Solar Solv is especially effective at loosening oily soils from “spun poly” fabrics at low temperatures. Solar Solv is typically utilized in conjunction with other Gurtler laundry products in specially crafted laundry operations. It is most effective at lower temperatures, less than 120°F and has very controlled foaming properties.

Physical and Chemical Properties

Appearance: Transparent water-white liquid

Specific Gravity: 1.00 typical

pH: Neutral, typically 7.0 – 7.5

Temperature Range: 80°F to 120°F

Recommended Usage

The use of Solar Solv is dependent upon the type of washer, load size within the washer, soil level, and the material to be laundered. Your Gurtler technical sales representative will program automatic injection settings for your Gurtler VisTex liquid injection system.

Health and Safety

Solar Solv is an industrial detergent. Please read Safety Data Sheet for complete safety precautions and proper handling instructions. Keep out of reach of children.
