TECHNICAL DATA REPORT

TITLE Stamford 6738 P.O.G.

P.O.G. (Paint, Oil, Grease Remover) is a fast, effective spot remover for both water and oil based paints, varnish and grease. P.O.G. is compatible with all detergent systems and is non-contaminating. It is safe on most fabrics, although it is always good practice to test the spotting procedure on an unexposed part of the garment before working the spot itself. Apply P.O.G. full strength to stain, work gently with spatula or brush until stain is lifted and flush with volatile organic solvent or dry clean. Do not flush with steam unless spot is very small and garment is not to be re-cleaned.

For laundry use, dilute P.O.G. 1:1 with water, brush collar, cuff or stained area and wash.

PHYSICAL CHARACTERISTICS

APPEARANCE: Light colored

ODOR: Aromatic

SOLUBILITY: Completely soluble in water and solvent

FLASH POINT: >200ºF

SPECIFIC GRAVITY: 7.4 lbs. per gallon

12/13/16
