TECHNICAL DATA REPORT

TITLE Stamford 6736
PROTEEN

PROTEEN is a fast acting, quick rinsing wet side spotter used to remove protein stains such as blood, egg, vomit, ice cream, milk, etc.

Apply full strength, work gently with spatula or brush and flush with steam or water. Dry the wetted area or apply SSS as a leveling solution prior to drycleaning. It is always good practice to test the spotting procedure on an unexposed area of the garment before working the spot itself. Water soluble inks or dye stains in the reds may be removed by applying PROTEEN and then TRIK Should a color change occur with PROTEEN, it may be restored by neutralizing with TRIK.

PHYSICAL CHARACTERISTICS

APPEARANCE: Blue liquid

ODOR: Ammoniated perfumed

SOLUBILITY: Water and steam soluble

FLASH POINT: None

SPECIFIC GRAVITY: 8.2 lbs. per gallon

12/13/16
