TECHNICAL DATA REPORT

TITLE Stamford 6735
TRIK

TRIK is a fast acting, quick rinsing wet side spotter used to remove tannin stains such as coffee, tea, beer, soft drinks, liquor, fruit juices, berry stains, grass stains, mustard, etc.

Apply full strength, work gently with spatula or brush and flush with steam or water. Dry the wetted area or apply SSS as a leveling agent solution prior to drycleaning. It is always good practice to test the spotting procedure on an unexposed area of the garment before working the spot itself. Water soluble inks and dye stains in the blue or green may be removed by applying TRIK and then PROTEEN. Should a color change occur with TRIK, it maybe restored by neutralizing with PROTEEN.

PHYSICAL CHARACTERISTICS

APPEARANCE: Light yellow liquid

ODOR: Soapy odor

SOLUBILITY: Completely soluble in water or steam

FLASH POINT: Will not flash or burn

SPECIFIC GRAVITY: 8.6 lbs. per gallon
